Jet Boat  
Specialists**

# REACHING

Just when dealers thought SBT reached the outer limits of the 'aftermarket' PWC industry, SBT continues to find ways to give them more—more of what dealers want to build loyalty and trust with their customers and the pricing to be competitive. For 2017, SBT is expanding its celestial sphere of products— from diagnostic tools to an ever-increasing line of new engines, OEM parts and accessories. With one-stop-shopping, rocket-fast shipping and stellar customer service, dealers no longer have to search the universe to get what they need.

## SCANNER Tool 102™

Diagnosing problems with PWC engines shouldn't be rocket science. SBT's Scanner Tool 102™ makes it easy—and now is the best time to buy. With hardware starting from \$295\*, get the cables and software you need to diagnose problems, make keys, adjust engine parameters, and more for both two strokes and four strokes.

Since the introduction of the BlackTip Elite line of custom seat covers and traction mats, it's been skyrocketing to become one of our most popular products. With edgy designs in a wide variety of colors and textures, it's sure to turn the heads of every skier. Look for our new, exclusive Signature Series featuring new colors and patterns to come in 2017!

# THE OUTER LIMITS

## SBT Brand Engines

No core? No problem. Dealers now have a cost-effective alternative when a 4-stroke engine goes supernova. SBT presents its own line of brand NEW 4-stroke engines, short blocks, cases and heads for Sea-Doo or Yamaha. SBT brand engines offer the same great warranty with no core needed! Need OE parts to complete the job? Look no further than SBT!

## Pump Parts

When sand and rock get sucked into a jet pump, they are like small asteroids that can damage the lining and even pierce the pump housing, resulting in slowing down or stalling a ski. Keep skis running at the speed of light with SBT's full line of pump parts. Choose from rebuild kits or new and remanufactured complete housings that bolt in quick and easy. Get your customers back on the water fast with SBT!

## SBT Brand Cables

Worn, stretched, or broken cables can leave a ski floating aimlessly with little or no control. Whether you need a throttle, steering, choke, reverse or trim cable, SBT's high-quality, drop-in replacement cables are constructed using internally lubricated, stainless-steel cable, OEM-style connectors, and high-strength sheathing.

## Impellers

World renown, Solas® is recognized as a leader in impeller design. Made from high-strength, corrosion resistant stainless steel, every Solas® impeller is cast in a one-piece mold. SBT carries a full line of Solas® brand impellers, intake grates, pump systems and accessories.

## NEW FOR 2017!

SBT works hard to provide dealers and mechanics with the highest-quality parts they need at the lowest price possible. To this end, SBT now offers an expanded line of Sea-Doo Spark and Kawasaki Supercharged Ultra parts for all models up to 2015. If you don't see what you need on our web site, call us and we'll make it our mission to get it for you.
